HAMILTON MONTHLY STATISTICS PACKAGE APRIL 2024

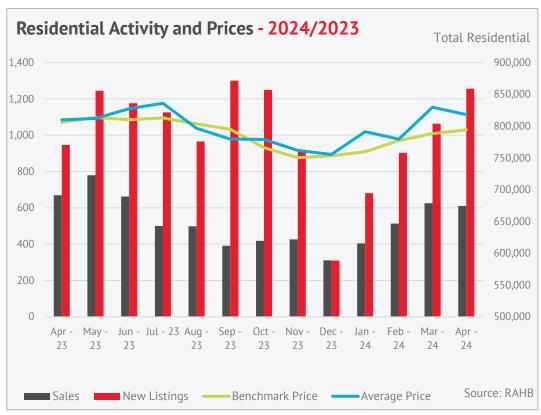

Brokerage | Independently owned and operated

SUMMARY

Sales in April slowed to 611 units, nine percent lower than last year and enough to cause year-to-date sales to remain comparable to last year. Year-to-date, most of the pullback has been driven by the detached market. At the same time, new listings rose to 1,257 units, causing the sales-to-new listings ratio to fall to 49 per cent, driving inventory gains. Overall, the months of supply rose to nearly three months, the highest reported for the month of April since 2020.

The unadjusted benchmark price in April was \$794,400, a slight gain over last month and over one per cent lower than levels reported last April. Prices generally trended down in the second half of last year, and while they have been trending up compared to the end of 2023, they have yet to reach the levels reported during the spring of 2023.

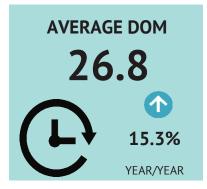

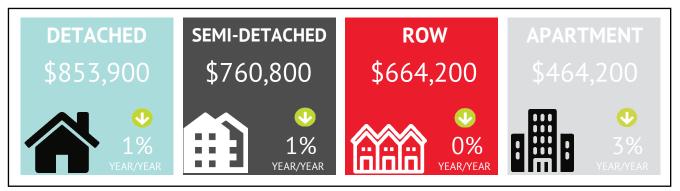

PROPERTY TYPES

The year-to-date pullback in detached sales was offset by gains in the higher density sectors. So far this year, new listings across all property types have been rising, supporting inventory gains. Row homes reported the most significant inventory gain compared to last year. Rising inventory coupled with slowing sales caused the months of supply to rise across all property types compared to 2023. Row and semi-detached homes continue to face the tightest conditions with less than two months of supply, while the detached market saw the months of supply rise to nearly three months. Apartment-style homes have the most supply relative to demand with just over five months.

BENCHMARK PRICE

Hamilton Monthly Statistical Report - April 2024

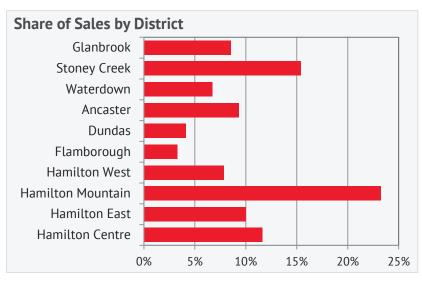

Royal LePage® Burloak Real Estate Services

REGIONAL SUMMARY

Year-to-date sales activity has varied within the region, as higher sales in Hamilton East, Flamborough, Dundas, Ancaster, and Glanbrook offset pullbacks in other areas in the region. However, the pullback in sales for Hamilton Centre and Hamilton West may be related to the supply of new listings, which did not see the same jump as other areas. Overall, the months of supply in April improved compared to last year across all areas in the Hamilton region. Months of supply range from under two months in Dundas to a high of nearly six months in Flamborough.
